OIL & GAS

October 2, 1996

Mr. Frank Chavez

New Mexico Energy, Minerals & Natural Resources Department  
Aztec District Office  
1000 Rio Brazos Road  
Aztec, New Mexico 87410

Subject: Request for Non-Standard Location Approval. MEU No. 9

RECEIVED  
OCT - 4 1996  
OIL CON. DIV.  
DIST. 3

Dear Frank:

Merrion Oil & Gas hereby requests administrative approval for an exception to the well location requirements for the Media Entrada Field under Rule 104 F.I.. The well is staked at a location that will provide efficient production within a pressure maintenance project.

Our reservoir analysis suggests that most of the producible Entrada oil has been swept and/or drained from the existing wells in the Media Entrada Unit (Location Plat enclosed). We are now in the last stages of oil production in this field and Merrion believes the MEU #9 should be drilled at the proposed location to effectively produce the remaining oil reserves.

The well location is non-standard, but in the direction of unit acreage. As you know, ownership is common within the unit area, and therefore, correlative rights would be protected.

If further is required, please let me know.

Sincerely,

  
Steven S. Dunn  
Drilling & Production Manager

Enclosure: Location Plat
