13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

Penwell Energy Inc. requests that a new proposed total depth for the above well of 6,400' be granted. This additional 400' of depth is needed to adequately log all 3D seismic intervals. The additional depth will not encounter any abnormally pressured formations and the current well design is adequate to handle the additional depth request.

14. I hereby certify that the foregoing is true and correct
