TO: ALL OPERATORS
FROM: Frank T. Chavez, District III Supervisor *FE*
SUBJECT: Downhole Logs
DATE: February 26, 1993

It has come to our attention that our office is sometimes not included in the distribution of many cased hole logs such as CBLs, noise logs, temperature logs, cement evaluation logs, casing inspection logs, etc. It is important that we receive these logs to perform our conservation duties. We should be notified prior to the time they are run in order to witness those of immediate interest to us. Therefore, all operators are required to notify this office at least 24 hours before cased hole logs are run and to file a copy of these logs with this office as soon as the logs are available.

Please check with your logging companies and submit these kinds of logs which have been run within the last two years that have not yet been submitted to this office.
