July 23, 1965

Well No. 1 is located SESE ft. from S line and 3 ft. from E line of sec. 28
SESE (1/4 Sec. and Sec. No.) 18N (Twp.) Sandoval (County or Subdivision) New Mexico (State or Territory)
Torrington (Field) 6625 (Elevation)

The elevation of the derrick floor above sea level is 6625 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

This well was drilled to depth of 920 feet. Schlumberger Induction-Electrical Logs. Casing Collar Log and Perforating Record. Perforating Depth Control Log. Shooting Log with five different sands perforated. No Oil, No Water. Nothing. Was set with 5 inch pipe cemented top to bottom of sand at 200 feet. Was washed, scrubbed, nothing. The shots were no good. But Schlumberger didn't take the blame. A most expensive well. You were mailed the logs when the well was finished. If you can't find them call Schlumberger 12/18/60. 12/28/60. For logs copy's. We had five.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
