(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

June 16, 1960

Well No. 1 Federal is located 1980 ft. from [N] line and 1990 ft. from [E] line of sec. 72

24 22 212 3 ETM
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Wildcat San Juan New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 6551 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

After drilling to a total depth of 3600, checking samples with microscope and fluorescence light and running induction log, it was found that no favorable oil or gas zone was encountered and plugging and abandonment permission is requested.

We plan to plug this well per instructions received from Mr. EMMET McGrath of the U. S. G. S. as follows:

Plugs:
3700-3600'
2800-2700'
Surface plug - 100-0'

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
