Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

We drilled a 17-1/2" hole to 543', set 537' of 13-3/8" surface casing, and cemented to surface. We reached a total depth of 9,703', driller's measurement, on 4-21-71. Evaluation using Dual Induction- Laterolog, Compensated Formation Density Log, and drill stem test (Dakota) showed an absence of prospective pay sands. Permission to plug and abandon was obtained from Mr. M. L. Seelinger with the U.S.G.S. on 4-21-71. Plugs were placed as follows:

60 sack plug	9500-9700'
30 sack plug	9200-9300'
37 sack plug	6950-7075'
30 sack plug	5550-5650'
45 sack plug	4250-4400'
45 sack plug	3300-3450'
10 sack plug	Surface pipe.

Welded on steel plate and marked.

18. I hereby certify that the foregoing is true and correct
