17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting and proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

Pursuant to our sundry notice dated 12-15-78 we wish to request the following

The road to the location will be graded prior to April 23, 1979. We will then obtain some butane to run the pump jack and place the well in operation.

If the well still produces mostly water we intend to plug the existing perforations, (2696-2706), with 100 sacks of cement.

After the cement sets up we intend to drill from the cement level which will be above 2696 out as well as the Go Elite BP at 2632, Baker BP at 2635, cement retainer at 2742 and its cement from 2742 to 2871, cement retainer at 3096 and its cement from 3605-3830.

Log cement and if good perforate Gallup with one shot at 3803, 3805, and 3808. Run tubing with packer set at 3750, spear head 500 gals 7 1/2" acid, and sand water frac with 40,000 #'s 10-20 sand.

Swab, <sup>remove packer,</sup> run rods and place Gallup back in production.

18. I hereby certify that the foregoing is true and correct
