

1971 DATA

卷之三

The image shows a large grid of handwritten Chinese characters, likely from a historical document or a calligraphic exercise. The characters are written in black ink on a light-colored background. They are organized into approximately 18 horizontal rows and 10 vertical columns. Each character is a single stroke, and they are all oriented in the same direction. The characters appear to be a mix of different styles, possibly representing various characters from the Chinese writing system.
