Completion or Recompletion Report and Log Form.)

16. SUMMARY OF COMPLETION OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any
production work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones perti-
nent to this work.)

This well was drilled through Pictured Cliff to test it for gas.
Was drilled by Rayco Drilling Co. of Farmington N.M. (Contractor).
Spudded 3-14-65. Set 90' 8 5/8 ground level 101' K.B.
30 sacks cement, drilled to 2539 T.D. 6 3/4 hole Ron Schlumberger
Electric Log. Well did not have productive sand.

Verbal permission was granted to plug by U.S.G.S. 3-18-65, pursuant
to regulations

17. I hereby certify that the foregoing is true and correct

Instructions

General: This form is designed for submitting proposals to perform certain well operations and reports of such operations when completed, as indicated, on Federal and Indian lands (hereinafter referred to as "Federal land") and on private lands, if approved or accepted by any State, on all lands in such State pursuant to applicable State law and regulations. Any necessary special instructions concerning the use of this form and the number of copies to be submitted, particularly with regard to local, area, or regional proposals and proposals which are slow or below or will be treated by, or any be obtained from, the local Federal and/or State office.

Item 4: If there are no applicable State requirements, locations on Federal or Indian land should be described in accordance with Federal requirements. Consult local State or Federal office for specific instructions.

Item 17: Proposals to abandon a well and subsequent reports of abandonment should include such special information as is required by local Federal and/or State offices. In addition, such proposals and reports should include reasons for the abandonment; data on any former or present productive zones, or other zones with present significant fluid contents not sealed off by cement or otherwise; depths (top and bottom) and method of placement of cement plugs; and or other material placed below, between and above plugs; amount, size, method of putting of any casing, liner or tubing pulled and the depth to top of any left in the hole; method of closing top of well; and date well site conditioned for final inspection looking to approval of the abandonment.
