Val R. Reese & Associates  
Lobby, Simms Building  
Albuquerque, New Mexico

Dear Val:

I have studied your plans for metering Gallup and Dakota gas on your #1 Sperling well in Section 30-24N-6W.

As you will have an accurate measurement on the gas from both formations prior to commingling I see no reason why your proposed procedure is not acceptable.

Yours very truly

Emery C. Arnold  
Supervisor, District #3
