Re: Harrington Federal No. 1  
Section 28, T-24N, R-1W  
Rio Arriba County, New Mexico

Dear Sir:

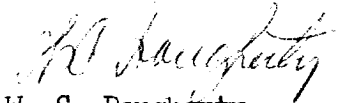

With reference to your letter under date of July 26, 1957, referring to our completion of the subject named well, please be advised that we have re-written our letter requesting tentative approval to complete this well in the Pictured Cliff zone only, or a single completion. Such letter is attached hereto.

We have neglected answering your letter of the above date due to so many vacations, etc., however we do wish to point out some facts referred to in your letter. The producing zone which we refer to as the Ojo Alamo according to our geologist is just above the Torrejon Puerco which we actually completed our Henry Schmitz No. 1 well in.

The subject well is to be completed in the Pictured Cliff which is just below the Torrejon Puerco zone.

We trust this information will answer your questions in letter dated July 26, 1957, and we further trust that our Harrington Federal file will be in order with your office. Thank you for your tolerance with this office.

Yours very truly,

W. C. Dougherty  
District Superintendent
