GEOLOGICAL SURVEY

SUNDRY NOTICES AND REPORTS ON WELLS

RECEIVED

NOTICE OF INTENTION TO DRILL	SUBSEQUENT REPORT OF WATER SHUT-OFF
NOTICE OF INTENTION TO CHANGE PLANS	SUBSEQUENT REPORT OF SHOOTING OR ACIDIZING
NOTICE OF INTENTION TO TEST WATER SHUT-OFF	SUBSEQUENT REPORT OF ALTERING CASING
NOTICE OF INTENTION TO RE-DRILL OR REPAIR WELL	SUBSEQUENT REPORT OF RE-DRILLING OR REPAIR
NOTICE OF INTENTION TO SHOOT OR ACIDIZE	SUBSEQUENT REPORT OF ABANDONMENT
NOTICE OF INTENTION TO PULL OR ALTER CASING	SUPPLEMENTARY WELL HISTORY
NOTICE OF INTENTION TO ABANDON WELL	

(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

May 3, 1961

Well No. 1-30 is located 1860 ft. from 1/4 line and 1900 ft. from W line of sec. 30

NE/4 of Sec. 30 (1/4 Sec. and Sec. No.) 24N (Twp.) 7W (Range) 100PM (Meridian)

Undesignated (Field) Rio Arriba (County or Subdivision) New Mexico (State or Territory)

The elevation of the derrick floor above sea level is 7219 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

April 30, 1961 - Plugged and abandoned with cement plugs as follows:
 Gallup - 5700-5800 - 20 Sacks cement
 Mesa Verde - 3175-3275 - 20 sacks cement
 Pictured Cliff - 2300-2400 - 20 sacks cement
 Water Sand - 1850-1950 - 20 sacks cement
 Top of surface casing - 10 sacks cement

MAY 8 1961
GEOLOGICAL SURVEY
DIST. 3

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company Bertram Production Company

Address 836 Mercantile Dallas Bldg.

Dallas 1, Texas

Title General Manager

1. Introduction
2. Methodology
3. Results
4. Discussion
5. Conclusion

The first part of the study focuses on the theoretical framework and the development of the research hypotheses. The second part describes the experimental design and the data collection process. The third part presents the statistical analysis and the results of the study. The fourth part discusses the implications of the findings and the limitations of the study. The fifth part concludes the study and provides suggestions for future research.

The results of the study show that there is a significant positive relationship between the independent variable and the dependent variable. This relationship is supported by the statistical analysis. The findings suggest that the theoretical model is valid and that the research hypotheses are supported. The implications of the findings are discussed in the next section.

The study has several limitations. First, the sample size is relatively small, which may affect the generalizability of the findings. Second, the study is cross-sectional, which does not allow for the examination of causal relationships. Third, the study is limited to the specific context and variables examined.

Future research should aim to address these limitations. A larger sample size and a longitudinal design would be beneficial. Additionally, the study could be replicated in different contexts to test the generalizability of the findings. The theoretical model could also be expanded to include other variables and relationships.

In conclusion, the study has provided valuable insights into the relationship between the independent variable and the dependent variable. The findings support the theoretical model and the research hypotheses. The study also identifies several limitations and suggests directions for future research.
