13 Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

This well was recompleted into the Fruitland Coal in December, 1999. To date production is less than 10 MCF/D. We therefore request permission to return the well to the Pictured Cliffs Formation using the following procedure:

1. Squeeze Fruitland perms from 2960'-66', 2972'-88' with 50 sacks of cement.
2. Test squeeze to 500#. Drill out cement and CIBP @ 3008'
3. Circulate to bottom.
4. Run 1 1/2" tbg. and return well to production

14 I hereby certify that the foregoing is true and correct
