(Note: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

Amerada Hess Corporation respectfully requests that production requirements be suspended for the above well under long term shut-in status for a period of one year or until the well can be produced at a profit. The well was producing at a rate of less than 5 MCFD in 1986 when it was determined by both Amerada Hess and EPNG that the well was uneconomical to produce because of existing market conditions. The meter run was blind flanged and temporarily taken out of service in 1987. Future plans are to place the meter run back into service and resume production of the well when market conditions improve.
