(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

December 17, 1958

Well No. 4 is located 660 ft. from S line and 1980 ft. from E line of sec. 20
SW 1/4 Sec. 20 T-24N R-2W N.M.P.M.
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Undesignated Rio Arriba New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 7134 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

The subject well was temporarily abandoned, March 12, 1954 at a total depth of 8464'. All perforations were squeezed in 7" casing and hole loaded with water and capped at surface.

Nothing has been done to this well since temporary abandonment and we are studying for possible recompletion in the Gallup Zone.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
