17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Bco, Inc. filed an intent on 6-9-71 to plug this well. The plugging plan as proposed by the USGS required the use of tubing. We have since decided that since we have to use tubing we will attempt to put this well back on production. In the event we are unable to economically place it back in production we will at that time go ahead and follow the plugging plan proposed 6-9-71.

Work on this well will not be started until at least after the spring thaw but no later than 6-30-72.

Our negotiations with the Apache Indians to take over this well have been terminated in that the purchase of the ranch this well is located on did not go through.

18. I hereby certify that the foregoing is true and correct
