Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting and proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.) *

Sept 18, 1991 Approval is requested for a change in proposed 2 7/8" casing depth from 5200' to 4750'.

Subject well was approved for slim-hole completion technique by Steve Mason on 11 September 1991. A follow-up Sundry Notice was submitted on 16 September 1991. Original plans called for setting and cementing 2 7/8" at 5200' inside of 4 1/2" casing.

Procedure has been changed to set and cement 2 7/8" at 4750'. This will provide for more annular volume thus making plunger lift operations more efficient.

Operations will commence on 23 September 1991.
