RECEIVED
NOTE: Report results of multiple completion zone change on Form 10-10-10
SEP 10 1982

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

* See attached modifications

This well has been previously approved for plugging. We are herein requesting approval of the following abandonment procedure.

Do not pull any of the 4 1/2" casing leaving the entire string in the hole. Cement with 270 sacks of Class B neat from top to bottom down the 4 1/2" casing. Place a dry hole marker.

Please contact Dave Simmons at the following numbers if additional information is needed. Home: 505-327-2613
Work: 505-326-2510

We propose to do this work by September 20, 1982.

Attachment to Notice of
Intention to Abandon

Re: Permanent Abandonment

Well: 6 Sunica Federal

CONDITIONS OF APPROVAL

1. Plugging operations authorized are subject to the attached "General Requirements for Permanent Abandonment of Wells on Federal Leases."
2. The Farmington office (telephone (505) 325-4572) is to be notified in sufficient time for a representative to witness all plugging operations.
3. Blowout prevention equipment is required.
4. In addition to normal filling of pits and cleanup of location, additional surface restoration work may be required, i.e. ripping of pad and/or access road, reseeding, etc. We have asked the Bureau of Land Management for the surface restoration requirements for this well and we should be able to furnish you these requirements within 30 days. After plugging the well and before making final clean-up, you should contact this office unless you have already been advised as to what additional surface restoration work is required.
5. The following modifications to your plugging program are to be made (when applicable):

- a) Spot cement in $4\frac{1}{2}$ " casing with tubing from T.D. to surface.
- b) Bradenhead squeeze $8\frac{5}{8}$ " x $4\frac{1}{2}$ " annulus with cement to cover surface casing shoe from 150' to surface.

Office Hours: 7:30 A.M. to 4:15 P.M.
