Attn: Ms. Velma L. McCluskey

Dear Ms. McCluskey:

The packer leakage tests on the Sperling 1-30 and the Lybrook 1-19 were received today. We will release the shut-in on these wells June 2, 1976.

With reference to your rework on your non-producing well, Commission Rule #1103 B 7 requires that the C-103 be filed giving the details on the intent to re-work and a subsequent report of the workover should be filed upon completion of the workover.

Yours very truly,

Norman E. Maxwell, Jr.
Engineer, District #3
