17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Ran CBL 6-24-80 and determined cement job over existing Gallup perforations, (5906 - 6143), is very poor. Two copies of said log are herewith transmitted to the USGS and one copy to the OCC.

Intend to set packer above existing perforations and cement same. If cement job is successful we intend to selectively perforate from 5934 - 6136 and sand water frac the new perforations. We will then place the well back in production.

Verbal approval obtained from Mr. Becker 6-27-80.

18. I hereby certify that the foregoing is true and correct
