So Blanco Pictured Cliffs Rio Arriba New Mexico  
(Field) (County or Subdivision) (State or Territory)

The elevation of the ground floor above sea level is 7160 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On September 20, 1961 a completion rig was moved on subject well. After several days of swabbing and sand pumping, subject well showed no indications whatsoever, of any gas. It was decided at that time to drill offset wells to this particular well in an attempt to obtain information which might be of value in attempting to complete this well as a commercial producer. It is now our intention to do remedial work on this well in the near future.
