Re: Quarterly Gas-Oil Ratio Tests  
Largo Spur #2, I-13-24M-7W

Dear Sir:

As the above well is in an over-produced condition we are hereby exempting it from the requirement of conducting the quarterly gas-oil ratio test for the month of April, 1966 and any future gas-oil ratio tests until the well has been brought into balance with its allowable. The well should remain shut in until the over-production has been curtailed.

Yours very truly

Emery C. Arnold  
Supervisor, District #3

Re: Our report dated April 14, 1966  
and your letter of 4-13-66

Dear Sir:

As the above well is in an over-producing condition we are not  
examining it for the purpose of increasing the quantity of oil  
which can be produced. In fact, we are not even considering  
this well for the purpose of increasing the quantity of oil  
which can be produced. The well has been known to produce with  
the production of the well. The well should remain shut in until the over-  
production has been corrected.

Very truly yours,

George H. Egan  
Supervisor, District 2
