(Field)

Rio Arriba  
(County or Subdivision)

New Mexico  
(State or Territory)

The elevation of the ground level ~~at the well~~ is 6470 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is proposed to drill a development well to test the Pictured Cliffs, Gallup and Dakota to an approximate depth of 6900'. Approx 200' of 8-3/8" surface cas will be set and cemented to top. If well is productive, 5 1/2" cas will be set and cemented through all possible pays. All possible producing zones will be adequately tested by 5-logs, DST's, etc. Should commercial production be found in the Gallup formation, an application for dual completion will be considered.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
