Apache-Federal
Well No. 9 is located 990 ft. from N line and 990 ft. from W line of sec. 17

SE NW NW 24N 3N N20W
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Undesignated Dakota Rio Arriba New Mexico
(Field) (County or Subdivision) (State or Territory)

ground level
The elevation at the well head is 6539 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is proposed to drill a development well to test the Pictured Cliffs, Gallup and Dakota to an approximate depth of 7050'. Approximately 250' of 8-5/8" surface casing will be set and cemented to top. If well is productive, 5 1/2" casing will be set and cemented through all possible pays. All possible producing zones will be adequately tested by S-logs, DST's etc. Should commercial production be found in the Gallup formation, an application for dual completion will be considered.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
