Dear Mr. Durrett:

A field inspection of the above location was made by Mr. W. B. Smith of this office on September 5, 1962. He reports that the well is located on the edge of a cliff which extends across the 40-acre unit. It is not possible to move into the valley to the East of this cliff without pushing the East line of Section 7 closer than the standard distance.

As the Devils Fork spacing rules are rather restrictive in that there is only about an acre of ground in each 40 on which a standard location can be drilled and as Mr. Merrion owns the offset acreage I hereby recommend that his application for a non-standard location be approved.

Yours very truly

Field inspection of the above location was made by Mr. W. R. Davis on September 12, 1964. He reports that the well is located on the edge of a valley which extends across the 40-acre plot. It is not possible to move from the valley to the east of the well without passing the adjacent T-1000 well. The adjacent T-1000 well is located on the edge of the valley and is located on the edge of the 40-acre plot.

Re: J. Gregory Merrion & Associates,
Edna Well No. 4, SE/4 NE/4 of
Section 7, Township 24 North,
Range 6 West, Rio Arriba County,
New Mexico

Dear Mr. Arnold:

We have received an application from J. Gregory Merrion for administrative approval of an unorthodox location for the above well. He requests a location 1733 feet from the North line and 1147 feet from the East line of Section 7 because of rough topography.

Would you please look into this matter and advise us at your earliest convenience as to whether or not you feel the topography in the area would justify granting the application. If you feel the topography does justify such a location, the application can be granted immediately as Mr. Merrion states he owns all of the acreage in the section. However, we will not issue an administrative order until we have received your approval of the location.

Very truly yours,

JAMES M. DURRETT, Jr.,
Attorney
