Re: Packer Leakage Test, Gulf Oil
Corporation #8 Jicarilla
Section 8-24N-5W

Gentlemen:

Our files indicate that this well was dually completed by your company in the Gallup and Dakota zones on June 15, 1959. An allowable has never been requested for either zone; however Oil Commission rules and regulations require that a packer leakage test be commenced within 10 days after completion of a dually completed well and submitted immediately upon completion of the test.

We have never received a packer test on the above well. Will you please give this matter your immediate attention.

Yours very truly

Emery C. Arnold
Supervisor, District #3
