June 7, 1958

McLane - Hall
Well No. 2 is located 1,595 ft. from [N] line and 895 ft. from [E] line of sec. 33
NE/4 Sec. 33 T 25-N R 3-W N.M.P.M.
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
So. Blanco P.C. Est. Rio Arriba County New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 7175 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Pictured Cliffs Test. Estimated total depth 3,700 feet.

Surface casing: 100' of 8-5/8" 24# J-55 cemented to surface with about 70 sacks.

Production: Approximately 3,700 feet of 5-1/2" OD 15.5# J-55 casing - cemented with 100 sacks.

If commercial production is indicated, the producing section will be sand water fractured and tubing will be run.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Title

1. The first part of the document discusses the importance of maintaining accurate records of all transactions and activities. It emphasizes that this is crucial for ensuring transparency and accountability in the organization's operations.

2. The second part of the document outlines the specific procedures and protocols that must be followed when conducting financial transactions. This includes details on how to properly document each transaction, the required approvals, and the timing of reporting.

3. The third part of the document provides a detailed overview of the organization's financial statements, including the balance sheet, income statement, and cash flow statement. It explains how these statements are prepared and how they are used to assess the organization's financial health and performance.

4. The fourth part of the document discusses the organization's budgeting process, including how the budget is developed, approved, and monitored. It also outlines the procedures for handling any variances between the actual results and the budgeted amounts.

- The fifth part of the document discusses the organization's internal controls, which are designed to prevent and detect errors and fraud. It outlines the key components of the internal control system, including the segregation of duties, the authorization of transactions, and the documentation of transactions.

5. The sixth part of the document discusses the organization's risk management process, which is designed to identify, assess, and mitigate the risks that the organization faces. It outlines the key components of the risk management system, including the identification of risks, the assessment of risks, and the implementation of risk mitigation strategies.

6. The seventh part of the document discusses the organization's compliance with applicable laws and regulations. It outlines the key components of the compliance system, including the identification of applicable laws and regulations, the assessment of compliance risks, and the implementation of compliance measures.

7. The eighth part of the document discusses the organization's information management system, which is designed to ensure the accuracy, integrity, and availability of the organization's information. It outlines the key components of the information management system, including the identification of information needs, the assessment of information risks, and the implementation of information management measures.

8. The ninth part of the document discusses the organization's human resources management system, which is designed to ensure the effective management of the organization's human resources. It outlines the key components of the human resources management system, including the identification of human resources needs, the assessment of human resources risks, and the implementation of human resources management measures.
