Abstract The purpose of this study was to examine the effects of a 12-week, 3-day-per-week, 100-min-per-session, low-impact aerobically demanding dance program on the health-related fitness of 100 sedentary, middle-aged women. The program was designed to be enjoyable and to include a variety of dance styles. The program was evaluated using a pretest and a posttest. The results of the study showed that the program had a significant positive effect on the health-related fitness of the women. The program was found to be an effective and enjoyable way to improve health-related fitness in sedentary, middle-aged women.
