January 11, 1965

New Mexico Oil Conservation Commission
P. O. Box 697
Aztec, New Mexico

Gentlemen:

This is to advise the Commission that Continental Oil Company plans to install the Otis "Dual Flow Choke Assembly" as authorized by Order No. R-2824, in Jicarilla Apache 28 Well No. 1, Unit P, Section 28, T25N, R4W, on January 13, 1965, at approximately 8:00 A.M. Only the check valve portion of the tool will be run at this time. After the well has been swabbed in, the orifice head assembly will be run with the Gallup zone blanked off and the well will be shut-in to conduct the packer-leakage test. It is anticipated the packer-leakage shut-in will commence January 15, 1965.

If for any reason the above dates and times are changed, the Commission will be notified by telephone.

Very truly yours,

F. E. Ellis
Assistant District Manager
Durango District
Production Department
