Re: Jicarilla "B" Well #24
Sec. 6, T24N-R5W
Rio Arriba County, NM

United States Geological Survey
P. O. Box 1809
Durango, CO 81301

Gentlemen:

The following is a development plan for surface use in the drilling of our Jicarilla "B" Well #24. Also attached is an application to drill the well. (Form 9-331C)

1. Existing Roads: Highway #44 South of Bloomfield, NM, 55 miles to Counselor, turn left 9 miles to Y in road. Take right fork of Y and stay on main road across bridge and continue on road to El Paso's Lindrith Camp. Just short of camp turn left, then another quick left and go North 1 mile across bridge and take first left 1 1/4 miles to location. (See Ex. I)
2. Planned Access Road: Approximately 1/2 mile across rolling land to be improved and constructed. (See Ex. II)
3. Location of Wells: (See Ex. III)
4. Lateral Roads: There will be no roads other than indicated in item 2 above.
5. Tank Batteries & Flowlines: If the well is a producer, we plan to set 1-300 bbl tank and a three phase separator. (See Ex. II)
6. Water Supply: Water source will be a water hole in the Largo Wash approximately 5 miles east of the well location.
7. Methods for Handling Waste Disposal: A reserve pit of adequate size will be used to handle waste and water disposal.
8. Location of Camps: None.
9. Location of Airstrips: None.
