March 12, 1976

MAR 18 1976 UIL COM. COM. 1 SIST 3

Mr. Joe Ramey, Director New Mexico Oil Conservation Commission Post Office Box 2088 Santa Fe, New Mexico 87501

Dear Mr. Ramey:

This is a request for administrative approval for an unorthodox gas well location in the South Blanco Pictured Cliffs pool. Terrain features make an orthodox location and access road expensive to build and maintain.

It is intended to locate the El Paso Natural Gas Company Jicarilla 123 C (Jicarilla 123) #18 650' from the North line and 800' from the East line of Section 6, T-25-N, R-4-W, NMPM, Rio Arriba County, New Mexico. The northeast quarter of Section 6 is dedicated to this well.

The terrain in the Northeast quarter of Section 6 has a very narrow ridge through it. An orthodox location would require a steep access road and a more expensive location. For these reasons, it is requested that the unorthodox location be approved.

El Paso Natural Gas Company is the only offset operator of this section.

Plats showing the proposed well location with terrain features and operator of offset leases are attached.

Yours truly,

D. R. Read

Division Drilling Engineer

Mr. Jerry Long U. S. Geological Survey Post Office Box 1809 Durango, Colorado 81301

> Re: Application for Permit to Drill Jicarilla 123 C #18

> > NENE/4 Section 6, T-25-N, R-4-W South Blanco Pictured Cliffs

Dear Mr. Long:

Details regarding existing roads, pipelines, wells, etc. relative to the above well location are included on the previously submitted base maps, "Field Road Map" and "Composite Map No. 1".

The proposed new well location, new roads and new pipeline are shown on the attached plat along with connecting existing roads and pipelines in the vicinity of the proposed new well.

Water for drilling and completion operations will be obtained from a water hole located in SW 9-24-4, the Old Cottonwood Hole.

Waste material will be disposed of by burial in the burn pit, latrine, or reserve pit as applicable. There will be no camp nor air strip associated with drilling this well. Upon completion or abandonment of this well, the location will be cleaned and leveled and a dry hole marker placed, if applicable.

Yours very truly,

D. G. Brisco

Drilling Clerk
