(NOTE: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting; any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

This gas well was originally dually completed (03-19-77) from the Pictured Cliffs (perfs 2,810'-16'; 2,836'-41' and 2,845'-55') and the Chacra (perfs 3,676'-81'; 3,693'-95'; 3,701'-05'; 3,758'-61'; and 3,776'-92'). 2" OD Butress tubing was set at 3,784' with a packer and seal assembly at 2,920'. Approval has been granted by the New Mexico Oil & Gas Commission Order No. R-5775 dated August 1, 1978 to commingle the gas production from both zones. It is proposed to pull the 2" tubing and remove the seal assembly and re-run the tubing string with the bottom of the tubing at 3,781'.

18. I hereby certify that the foregoing is true and correct
