If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

This well was drilled and completed in July of 1977. The well would not produce so the well was re-perforated and fraced in April, 1978. The well still will not produce. Because of lack of production, it is recommended that this well be classified as temporarily abandoned for a period of one year for further evaluation.
