Re: Amerada Hess Corporation
Jicarilla Apache C #2
B-27-24N-5W

Gentlemen:

Returned herewith for recalculation is the 1979 deliverability test for the above well. Our records show that the subject well has 1½" IJ tubing set at 6682', and the measured pressures indicate that critical flow exists. If the tubing size has been changed, please file the necessary sundry notices.

If you have any questions, please call.

Yours truly,

Frank T. Chavez
Deputy Inspector
