DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any
proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones perti-
nent to this work.) *

ARCO Oil and Gas Company intends to remove a 300 bbl. oil tank from the indicated
lease for installation on one of our Southern Ute leases. The tank selected
to be moved contains approximately 7-8 inches of paraffin/tank bottoms. ARCO
respectfully requests permission to bury this paraffin/tank bottoms on the
well location prior to movement of the tank. The tank bottoms appear to be
comprised of mostly paraffin, sand and B S & W which has solidified requiring
it's removal by shoveling.

As per discussion between Dave Corzine
and Bruce Kennedy, a total of only one
barrel of paraffin/tank bottoms was
present. Bruce gave verbal approval
to bury the small volume on location.
