Re: Shipley #2
Unit G, Section 33, T-24-N, R-3-W
Rio Arriba County, New Mexico
Chacon Dakota Associated Pool

Dear Mr. Ramey:

This is a request by El Paso Exploration Company for administrative approval for a non-standard proration unit for the subject gas well located in the Chacon Dakota Associated Pool.

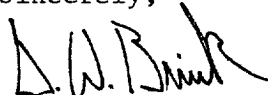

Reference is made to the special rules and regulations for the Chacon Dakota Associated Pool which states a standard oil proration unit shall be 160 acres and a standard gas proration unit shall be 320 acres.

The Shipley #2 is currently classified as a gas well which would require the 320 acres of the E/2 of Section 33-24-3 to be dedicated to this well. However, the Shipley #1, located in the SE/4 of Section 33-24-3, is classified as an oil well, which requires a 160 acre dedication. Since simultaneous dedication of acreage is prohibited, it is impossible to operate the Shipley #2 on a standard proration unit.

A copy of this application is being submitted to all offset operators by certified mail with a request that they furnish your Santa Fe office with a waiver of objection.

Plats showing the well location and offset ownership are attached.

Sincerely,

G. W. Brink
Project Drilling Engineer

Re: Non-Standard Proration Unit
Chacon Dakota Associated Pool

Gentlemen:

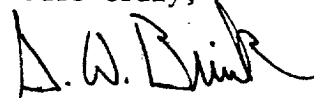

El Paso Exploration Company has requested administrative approval for a non-standard proration unit in the Chacon Dakota Associated Pool for its Shipley #2 well located in the NE/4 Section 33, T-24-N, R-3-W, Rio Arriba County, New Mexico.

The Shipley #2 is currently classified as a gas well which would require the 320 acres of the E/2 of Section 33, T-24-N, R-3-W to be dedicated to this well. However, the Shipley #1, located in the SE/4 of Section 33, T-24-N, R-3-W, is classified as an oil well which requires a 160 acre dedication. Since pool rules state that simultaneous dedication of acreage is prohibited, it is impossible to operate the Shipley #2 on a standard proration unit.

In compliance with New Mexico Oil Conservation Division rules, we are notifying you, as operator of an offsetting proration unit, of our application for administrative approval for a non-standard proration unit on this well. Enclosed are three copies of this letter. If there is no objection to this application, please sign and return one copy to the New Mexico Oil Conservation Division, P.O. Box 2088, Santa Fe, New Mexico 87501; one copy to El Paso Exploration Company; and keep one copy for your files.

Plats showing the well location and offset ownership are attached.

Yours truly,

G. W. Brink
Project Drilling Engineer
