Re: Myers #1 D-35-25N-3W

Dear Bill:

The referenced well was completed in the Mesaverde formation and then recompleted to the Chacra formation with no new C-104 being sent in at that time. Consequently, all of the production attributable to this well has been accumulated in the wrong pool records.

Also, there has been no Deliverability test run on this well. You are hereby directed to immediately schedule a test in conjunction with the pipeline.

Sincerely,

A handwritten signature in cursive script, appearing to read "Frank T. Chavez".

Frank T. Chavez
District Supervisor

FTC/dj
