17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Production from the subject well has gone to all water. Water analysis positively identified the Burrow Canyon as the water source. Cotton requests permission to set a BP @ approximately 7230', which is above the Dakota D perms, to test for communication between the Dakota A & Dakota D.

Approval is granted to test well for 90 days after installation of BP. At the end of that time it is required to permanently repair casing in order to produce well.
