(NOTE: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

We propose to complete the well in the Pictured Cliffs formation. The work would proceed as follows:

- 1) Set removable bridge plug above producing Chacra zone.
- 2) Run Blue Jet GSL log and analyze Picture Cliffs zone.
- 3) Spot 250 gallons 7.5% HCL across PC zone and perforate 3584 to 3605.
- 4) Swab back all acid.
- 5) Fracture with 70% N2 Foam frac with linear gel and 45,000# 20/40 sand. Volumes may be increased depending on GSL log. Maximum sand would be 90,000#.
- 6) Clean well and test PC zone.
- 7) Remove bridge plug.
