13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

On March 25, 1994, a workover unit was rigged up on this well to acidize it with 3000 gals of 15% HCl. Pressure testing of the casing during this operation identified a casing leak. A Conoco field representative talked with Shirley Mondy in the Albuquerque BLM Office requesting verbal approval to repair this casing leak. Ms. Mondy verbally gave approval to proceed with a cement squeeze, to be jointly prepared by Conoco's field representative and a cement service company. A subsequent Sundry will be filed detailing the results of the cementing operations.
