15. ELEVATIONS (SHOW DF, KDB, AND WD)  
6876' GR

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

Cotton is currently evaluating production performance of the Dakota Formation before moving up hole to the Gallup Formation in the Apache 129. We are trying to gather reservoir and production data on the Dakota and Gallup Formations individually. Pressure build up tests are being conducted in the Dakota on the Apache 116 and the Apache 119 now. Plans are to run pressure tests in the Gallup on the Apache 116 and the Apache 119 in the near future. Results from these tests will be used to determine the completion designs for the Gallup on the Apache 129.
