(NOTE: Report results of multiple completion
change on Form 9-330.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent data including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

This well is producing approx. 700 MCFGPD from the Nacimiento Formation.

Request permission to produce from the Nacimiento zone, leaving the Pictured Cliffs formation temporarily abandoned. Dual completion in a slim hole is difficult.

Dugan Production maintains that the Pictured Cliffs formation will produce significant amounts of natural gas to warrant temporary abandonment of this horizon until the Nacimiento zone declines in production.

A diagrammatic sketch is attached showing how the well is producing at this time.

Approval is granted to temporarily abandon Pictured Cliffs formation for one year.

Subsurface Safety Valve: Manu. and Type _____ Set @ _____ Ft.
