(NOTE: Report results of multiple completion on Well  
Completion or Recompletion Report and Log form.)17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any  
proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones perti-  
nent to this work.)\*

This well is presently being produced from the Chacra Formation from 3825-3962'.  
The Completion report was filed on 5/29/80.

Cotton Petroleum Corporation intends to dually complete this well in the Chacra and  
Pictured Cliffs Formation. Approval for the dual completion has been received from the  
Oil Conservation Division, State of New Mexico in Administrative Order MC-2651 (attached).

The pictured Cliffs will be perforated with 1 JSPF from 2976-2985', 2988-2992',  
2995-3008', 3020-3023', and 3039-3043'. This zone will be fractured with 72,000 gallons  
70% quality foam containing 90,000# 12-20 mesh sand. The treatment will be performed  
down casing, with a bridge plug set between the Pictured Cliffs and the Chacra to protect  
the Chacra.

18. I hereby certify that the foregoing is true and correct
