Subsequent Sundry for a one-year extension on the currently T&A'd well. The Connie #28-1 was T&A'd (10/5/85) with a CIBP over the Gallup formation. Upon the new ruling on T&A'd wells passing a casing pressure test, it is requested the one-year extension be approved. The casing was tested to 500 psi and held for 20 minutes (5/28/86). Another test can be performed for your office's witnessing upon request. The well's first year's T&A status expires (9/16/86). Please notify if another test is required.
