MULTI-POINT SURFACE AND OPERATIONS PLAN

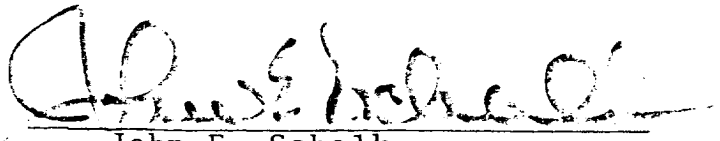

- 1) Existing Roads: Departs from NM 44 and travels in a Northeastern direction. Existing road, as shown on attached map, enters the Southern edge of Section 7. This pipeline road runs North through Section 7 and enters Section 6 at it's Southern line. Continuing North, the road goes directly past proposed location.
- 2) Planned access road: None.
- 3) Location of existing wells: See attached map.
- 4) Location and type of water supply: Water will be taken from a water hole on Schmitz's ranch and transported to location by truck.
- 5) Source of construction materials: None.
- 6) Methods of handling waste disposal: Cuttings to be disposed of in a reserve pit; a burn pit to be used for disposal of trash, garbage, etc.; and covered on clean-up of location.
- 7) Ancillary facilities: None.
- 8) Well site layout: Per attached drawing.
- 9) Restoration of surface: Upon completion of drilling operations, the disturbed surface area will be restored as near as practical to its original contours. If sufficient top soil is encountered, it will be stockpiled for restoration of surface. Restoration will be to the satisfaction of the U. S. G. S.
- 10) This location slopes at an increase of 40° to the West. There will be approximately a 20 to 30 foot cut on the West side of the proposed location. Vegetation is Pinon, Juniper, sagebrush, salt-bush, scrub oad, mountain mahogany, bitterbrush, snakeweed, indian ricegrass. The surrounding area is comparable and any disturbances to the wildlife will be only temporary. With the restoration of surface, surface damage will be minimal.
- 11) Lessee's or Operator's Representatives: John E. Schalk, P. O. Box 25825, Albuquerque, New Mexico, 87125; Steve Schalk, 6200 Rio Hondo, NE, Albuquerque, New Mexico; or Joe D. Christesson, 2301 Southside River Road, Farmington, New Mexico, 87401.

CERTIFICATION

I hereby certify that I, or persons under my direct supervision, have inspected the proposed drillsite and access route; that I am familiar with the conditions which presently exist; that the statements made in this plan are, to the best of my knowledge, true and correct; and, that the work associated with the operations proposed herein will be performed by Arapahoe Drilling Co. and its contractors and sub-contractors in conformity with this plan and the terms and conditions under which it is approved.

DAMAGE RELEASE

THE UNDERSIGNED, for and in consideration of the amount shown below, the receipt of which is hereby acknowledged, releases John E. Schalk, his agents, contractors and employees, from all claims of any kind or character for damages sustained by the undersigned caused by the construction of a roadway and location for use in drilling operating gas or oil wells in the vicinity, or the project named below, with appurtenances thereto, over and through the hereinafter described property.

The Undersigned represents that he is legally entitled to possess and occupy the surface of said property and is, therefore, entitled to receive payment for the damages sustained thereto.

DESCRIPTION OF PROPERTY SITUATED IN Rio Arriba COUNTY,
STATE OF New Mexico.

SURFACE REHABILITATION AGREEMENT

THIS AGREEMENT as of May 1, 1980,
by and between Tony Schmitz, hereinafter
called "Surface Owner", and John E. Schalk
hereinafter called "Operator".

WITNESSETH:

WHEREAS, Operator desires to construct a location
for the drilling of a natural gas well and/or oil well on
surface land owned by Surface Owner.

NOW, THEREFORE, in consideration of the premises,
Surface Owner and Operator agree as follows:

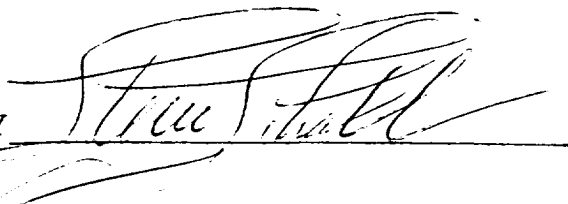

- 1) Operator will construct or cause to
be constructed an access road to the
proposed location from the nearest
existing road as the terrain will
allow. The road will be permanently
maintained to allow access to the
location throughout the drilling
operation and while the well is in
a producing state.
- 2) Upon completion of drilling operations,
Operator will restore the disturbed
surface area as near as practical to
its original condition, except for
permanent facilities necessary to
producing a natural gas or oil well.
Restoration will follow the guide-
lines as set forth by the U. S.
Geological Survey.

IN WITNESS WHEREOF, the parties hereto have caused
this agreement to be duly executed on the day and year first
above written.

An Archaeological Clearance Survey of
Three Proposed Well Locations & Access Roads
Conducted for John Schalk

On April 30, 1980, L. Jean Hooton from the Cultural Resource Management Program, New Mexico State University, San Juan Campus, conducted an archaeological clearance survey of three proposed well locations and access roads at the request of Mr. Johnny Ahlm from Arapahoe Drilling.

Present during the survey were Mr. Steve Schalk representing John Schalk, Mr. John Keller from the U.S. Geological Survey - Farmington office, and Mr. Dan Armstrong from the U.S. Bureau of Land Management - Rio Puerco office.

The proposed well locations are on private lands with Federal minerals and were surveyed under Federal Antiquities permit 80-NM-004.

METHODOLOGY

The well locations were surveyed by walking parallel transects, 75 feet apart, over a 300 x 300 foot easement. Proposed access roads were surveyed by walking the flagged route to and from the well.

GENERAL RECOMMENDATIONS

No cultural resources warranting avoidance were found during the course of the survey, therefore archaeological clearance is recommended for the inspected areas.

Proposed Well: SCHALK - GULF #1

Land Status: Fee surface - Federal minerals.

Location: The proposed location is in the NE $\frac{1}{4}$ of the SE $\frac{1}{4}$ of the NE $\frac{1}{4}$ of Section 6, Township 25 North, Range 3 West, N.M.P.M., Rio Arriba County, New Mexico. The well will be 1700 feet from the north line and 905 feet from the east line of Section 6. (Figure 1)

U.T.M.: Center - 13; 3,04,600 mE; 40,33,770 mN.

Access: Existing.

Area Surveyed: 2.07 acres.

Terrain: Highly eroded steep slope with southeasterly drainage, alluvial surface deposits, and sandstone outcrops.

Soil: Sandy clayey loam.

Vegetation: ~~Pinon~~ Piñon, juniper, sagebrush, saltbush, scrub oak, mountain mahogany, ~~bit~~ bitterbrush, snakeweed, indian ricegrass.

Cultural Resources: Three sherds were found along the steep and eroded slope on the western side of the location and were probably washed down from the small mesa top west of the location. No other cultural resources were found on the location.

Recommendations: ~~Clearance~~ Clearance recommended.

Proposed Well: SCHALK - GULF #2

Land Status: Fee surface - Federal minerals.

Location: The proposed location is in the SW $\frac{1}{4}$ of the NE $\frac{1}{4}$ of the NE $\frac{1}{4}$ of Section 8, Township 25 North, Range 3 West, N.M.P.M., Rio Arriba County, New Mexico. The well will be 925 feet from the north line and 790 feet from the east line of Section 8. (Figure 1)

U.T.M.: Center - 13; 3,06,220 mE; 40,32,185 mN.

Access: 20 feet wide and 250 feet long, approaching the location from the north.

Area Surveyed: 2.18 acres.

Terrain: Rolling slope with northwesterly drainage, alluvial surface deposits.

Soil: Sandy clayey loam.

Vegetation: Pinon, juniper, sagebrush, snakeweed, prickly pear, grama, squirreltail.

Cultural Resources: None found.

Recommendations: Clearance recommended.

Proposed Well: SCHALK - GULF #3

Land Status: Fee surface - Federal minerals.

Location: The proposed location is in the NE $\frac{1}{4}$ of the SW $\frac{1}{4}$ of the SE $\frac{1}{4}$ of Section 6, Township 25 North, Range 3 West, N.M.P.M., Rio Arriba County, New Mexico. The well will be 1120 feet from the south line and 1520 feet from the east line of Section 6. (Figure 1)

U.T.M.: Center - 13; 3,04,380 mE; 40,32,855 mN.

Access: 20 feet wide and 900 feet long, approaching the location from the east.

Area Surveyed: 2.48 acres.

Terrain: Gently rolling slope with southerly drainage and alluvial surface deposits.

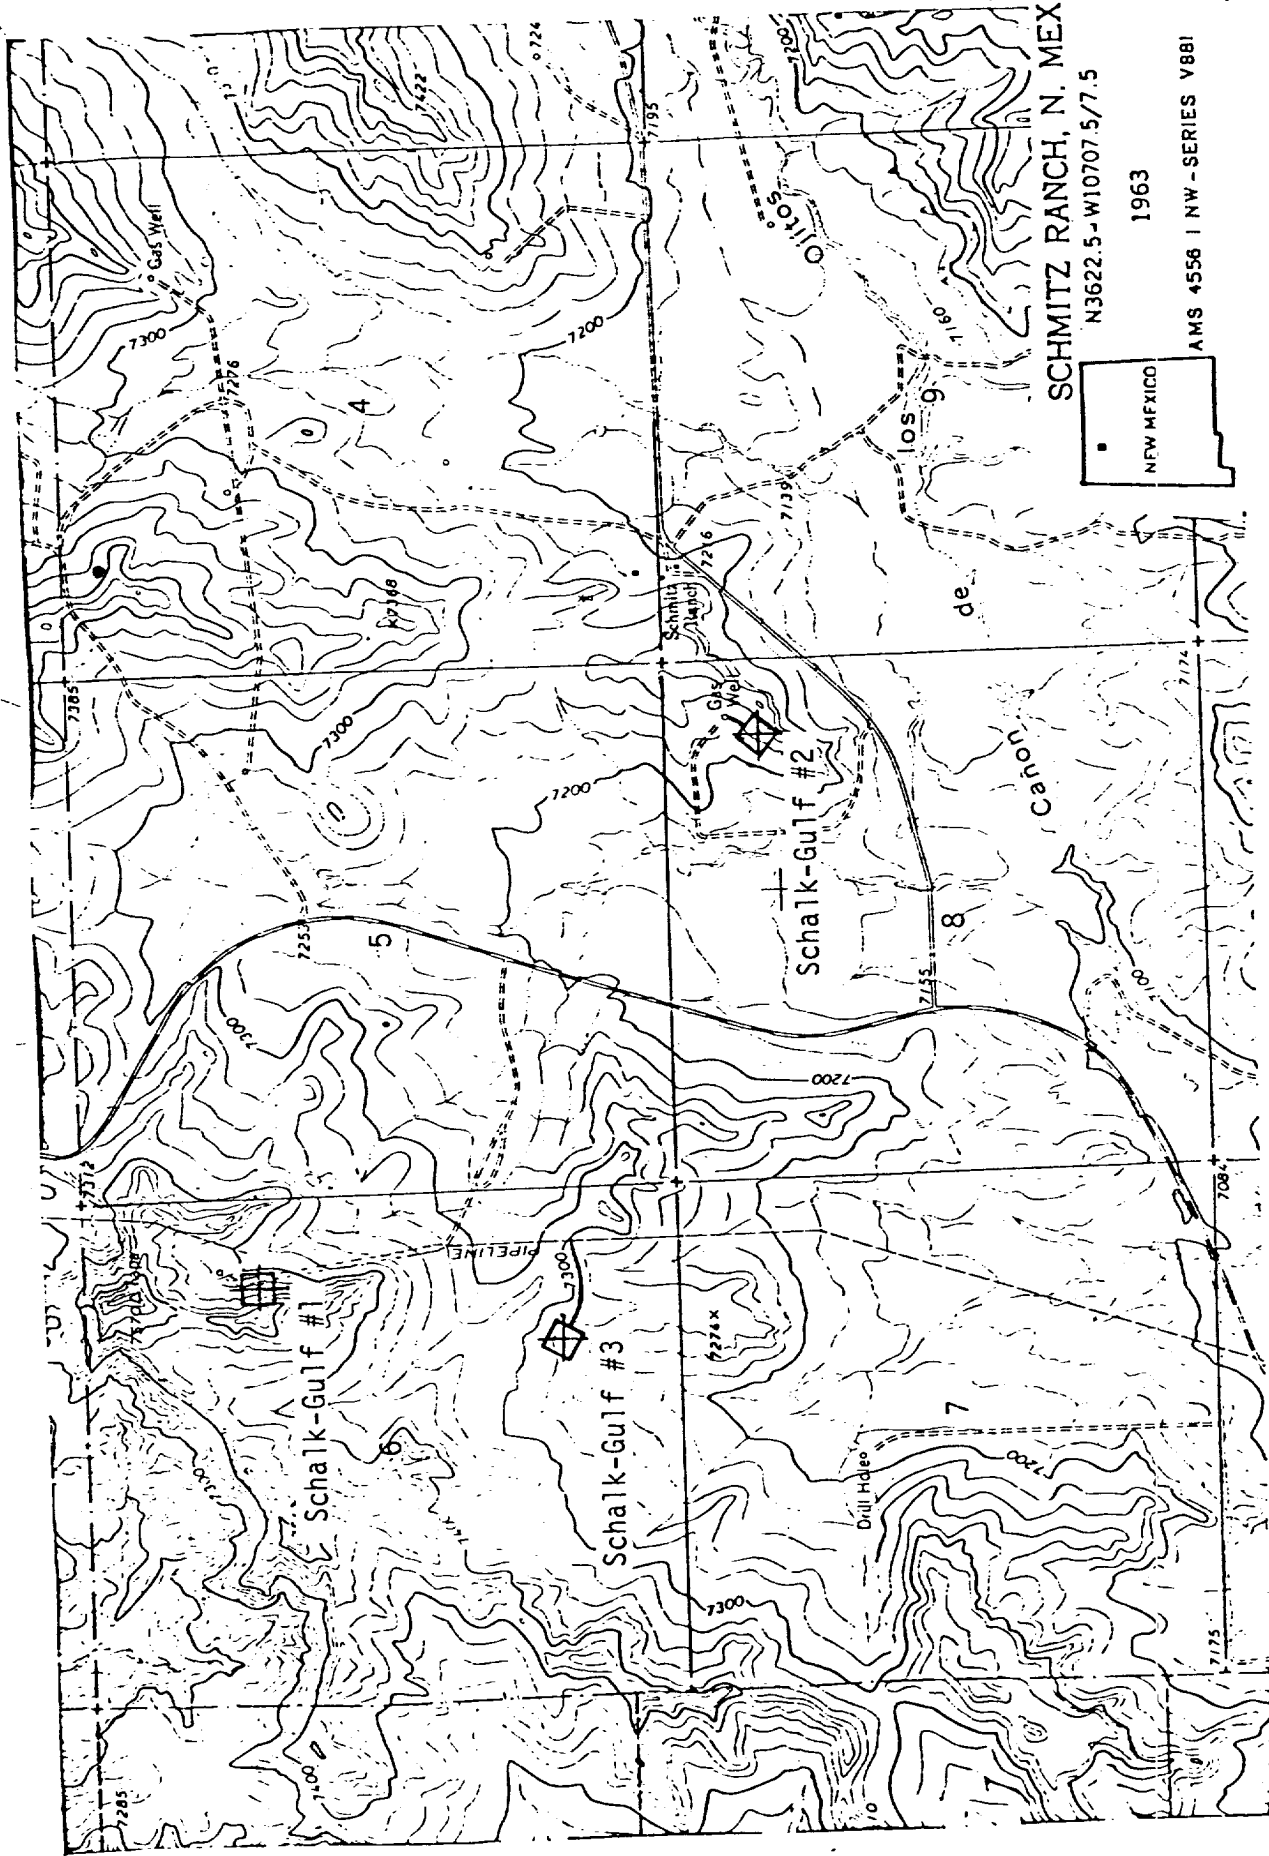

Soil: Sandy clayey loam.

Vegetation: Piñon, juniper, sagebrush, snakeweed, indian ricegrass, crested wheat, grama, galleta, lupine, king's crown.

Cultural Resources: None found.

Recommendations: Clearance recommended.
