17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

We propose to pull the tubing and then run a cement bond log. Depending on the logging results we may:

- 1) Shoot squeeze holes at an unknown depth, set a cement retainer and attempt to squeeze off the water with 100 sxs of cement.
- 2) Only set a cement retainer and then test the well.

Under case to evaluation of well for six months & then squeeze lower parts.
