Attention: Mr. Mark K. Mosley, Division Manager

Administrative Order TX-86

Gentlemen:

Reference is made to your request for an exception to the tubing setting requirements as contained in Division Rule 107(d)(3) for the below-named well.

Pursuant to the authority granted me by Rule 107(d)(4), you are hereby authorized to set tubing at 0 feet in the following well:

<u>LEASE NAME</u>	<u>WELL NO.</u>	<u>UNIT</u>	<u>S-T-R</u>
Northeast Haynes Rio Arriba County	12	0	16-24N-5W

(This well is to be produced through the 3 1/2-inch casing with a string of 1 1/4-inch tubing to be installed to unload liquids if necessary.)

The Division reserves the right to rescind this authority in the event that waste appears to be resulting therefrom.

Very truly yours,

  
JOE D. RAMEY,  
Division Director

Attn: Joe Ramey

Gentlemen:

Conoco Inc. respectfully requests administrative approval to produce Northeast Haynes No. 12 as a tubingless completion.

The Northeast Haynes No. 12 is a gas well in Pictured Cliffs formation. It is located 1080' FSL & 1650' FEL of Section 16, T-24N, R-5W in Rio Arriba County.

This well was drilled to a total depth of 2550' with the following casing and cementing programs:

Casing:

surface - 8-5/8", 24#, K-55 set at 295'  
production - 3-1/2", 9.3#, EUE set at 2549'

Cement:

surface - cemented with 220 sx Class "B" to surface  
production - cemented with 275 sx 50-50 pozmix and 100 sx Class "B" neat. Cement top at 1475' from temperature survey

This well has been producing with an average daily rate of 1024 MCFPD with little or no fluid production. In the event the well begins significant production of liquids, Conoco intends to run 1-1/4", 2.1#, I.J. tubing to unload the well.

In our opinion, no loss of production and/or reserves due to the above well completion will result, therefore, we respectfully request administrative approval to produce this well as a tubingless completion.

Yours very truly,

M. K. Mosley  
Division Manager
