13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Plans are to permanently abandon the Gallup and Dakota zone perforated intervals by setting cast iron bridge plugs with 3 sacks cement (35') on top of each interval at approximately 7800' (79' above top Dakota zone perforations), and approximately 6750' (71' above top Gallup zone perforations). Lower Point Lookout intervals 5784'-5794' and 5759'-5771' to be perforated, acidized and tested. Due to the tight rig supply, this work previously scheduled to commence on or before November 15, 1998 has been deferred to commence on November 30, 1998.
