U. S. GEOLOGICAL SURVEY
FARMINGTON, N. M.

(NOTE: Report results of multiple completion or zone change on Form 9-330.)

(other) Completion Operations - Proposal to Set Retrievable Production Packer

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

It is requested that the Sundry Notice dated May 7, 1982, requesting a permanent bridge plug, be disregarded.

*It is proposed to run a retrievable production packer on the 2-3/8" tubing and set the packer at approximately 7,600'. Tail-pipe will be run below the packer to 8,000'. A seating nipple will be run below the packer and a "sliding sleeve" above the packer so that either zone (Dakota or Gallup) may be produced separately through the tubing.

This will be a temporary installation for evaluation of each zone.

* As per discussion J. Simms (MMS) and L. O. Van Ryan (NWE) 5-14-82.

Subsurface Safety Valve: Manu. and Type _____ Set @ _____ Ft.

18. I hereby certify that the foregoing is true and correct
