(NOTE: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Mesa Grande Resources, Inc., plans to place the Gavilan Greenhorn/Graneros/Dakota on production in this well. The Gavilan Mancos will be produced up the casing, and the Greenhorn/Graneros/Dakota will be produced up the tubing.

The planned procedure is as follows:

1. MIRU. TOOH with rods, pump, and tubing.
2. Retrieve RBP at 7145'.
3. TIH with tubing and sting into Model "D" packer currently set at 7150'.
4. RD MOSU. Return to production.

The Mancos and Greenhorn/Graneros/Dakota oil production will be commingled on the surface. Gas production from the two zones will be metered individually.

18. I hereby certify that the foregoing is true and correct
